For example, to start the Calculator program, type CALC at the DOS prompt: C> CALC. Press the Enter key, and the Calculator program pops up on-screen. (Your DOS prompt window doesn ' t go away; just click it with your mouse to continue using DOS.) If your computer is set up to run some sort of menu system, try typing MENU at the DOS prompt to ...

Mastering DOS Basics - dummies

The DOS API is an API which originated with 86-DOS and is used in MS-DOS/PC DOS and other DOS-compatible operating systems. Most calls to the DOS API are invoked using software interrupt 21h (INT 21h). By calling INT 21h with a subfunction number in the AH processor register and other parameters in other registers, various DOS services can be invoked. These include handling keyboard input ...

## DOS API - Wikipedia

When you used the /p switch with the dir command, you specified that MS-DOS should pause after it displays each screen of directory list information. The p actually stands for "page" Another helpful switch you can use with the dir command is the /w switch. The /w switch indicates that MS-DOS should show a wide version of the directory list.

## Learning MS-DOS Basics - A Tutorial

The edit command starts the MS-DOS Editor tool, which is used to create and modify text files. Edlin: The edlin command starts the Edlin tool, which is used to create and modify text files from the command line. Edlin was only available up to MS-DOS 5.0 so unless your version of MS-DOS 6.22 was upgraded from 5.0, you likely won't see the edlin ...
