Guided imagery is a focused practice that involves each of the five senses to ignite positive healing messages throughout the mind and body. The practice is often interchanged with visualization, self-hypnosis and guided meditation, but it has its own set of techniques. The benefits of guided imagery are vast — there is research that shows the practice can reduce fear and anxiety, lessen the frequency of headaches and has been proven to decrease psychological distress in cancer patients.

Natural environments are calming for many people, so using a guided imagery forest script is an excellent way to reduce stress. The protected feeling of being underneath a canopy of trees allows the participant to feel in control of what happens in the forest, and may offer them a sense of comfort and peace.
