Nanotechnology Question Paper

Question 10: If you were to shrink yourself down until you were only a nanometer tall, how thick would a sheet of paper appear to you? You didn't select an answer. The answer is: 170 kilometers. An average sheet of paper is approx. 0.1 mm thick; in other words: 100,000 nanometers. Let's assume the average height of a person to be 1.7 meters.

This GCSE Chemistry quiz is all about nanotechnology - the handling of matter on an atomic level. In 1981, Gerd Binnig and Heinrich Rohrer developed the scanning tunneling microscope. This is an instrument for imaging the surfaces of matter at the atomic level, for which they received the Nobel Prize in Physics in 1986.

free research paper-nanotechnology

The term nanotechnology actually didn't appear until Norio Taniguchi used it fifteen years later in 1974 in a paper on ion-sputter machining. These ideas began to become technically possible in 1981 when with the recently invented scanning tunnelling microscope (STM) allowed materials to be seen at the atomic level.
