Written by a core contributor to the framework, Node: Up and Running: Scalable Server-Side Code with JavaScript shows you how Node scales up to support large numbers of simultaneous connections across multiple servers, and scales down to let you create quick one-off applications with minimal infrastructure. Built on the V8 JavaScript engine that runs Google Chrome, Node is already winning the hearts and minds of many companies, including Google and Yahoo!

Node: Up and Running: Scalable Server-Side Code with ...

Fast forward to the 2009's JSConf EU, where Ryan presented Node.js. I was gratified to learn of Node and to see how well it realized the end-to-end JavaScript vision, especially how it wisely built in nonblocking I/O from the roots up. Ryan and core folks have done a great job keeping the core small. Isaac and all the module owners have

Node: Up and Running - TINET

No problem with horizontal scaling of node.js server and duplication of job execution. Setting up agenda.js. This is a good way of installing agenda in a project. First, initialize agenda.js and create a singleton, this is what we are going to use in the whole application. File jobs/agenda.js

3 node.js scalability problems and how to solve them
