Handbook of Cane Sugar Engineering - 1st Edition

The book explores sugarcane's 40 year history as a fuel for cars, along with its impressive leaps in production and productivity that have created a robust global market. In addition, new prospects for the future are discussed as promising applications in agroenergy, whether for biofuels or bioelectricity, or for bagasse pellets as an alternative to firewood for home heating purposes are explored.

CANE SUGAR MANUFACTURE IN INDIA - QUT

Sugar cane is a perennial grass that thrives well in tropical and frost-free warm temperate areas. It requires high temperatures, plenty of sunlight, large quantities of water (at least 1500 mm of rain per year unless grown with irrigation), fertile soils, and good drainage. The crop cycle varies between 10 and 24 months, but can be extended four times or more by additional ratoon cropping ...
