SunOS 5.3 Writing Device Drivers:

Page 23/40

Access PDF Sunos 5 3 Writing Device Drivers Sun Microsystems Press... Kit

SunOS is a Unix-branded operating system developed by Sun Microsystems for their workstation and server computer systems. The SunOS name is usually only used to refer to versions 1.0 to 4.1.4, which were based on BSD, while versions 5.0 and

Access PDF Sunos 5 3 Writing Device Drivers

later are based on UNIX System V Release 4, and are marketed under the brand name Solaris

SunOS - Wikipedia

The device driver interface/driver-kernel interface (DDI/DKI) is a new name for the routines formerly called

Access PDF Sunos 5 3 Writing Device Drivers

"kernel support routines" in the SunOS 4.1 Writing Device Drivers manual, and for the "well-known" entry points in the SunOS 4.1 cdevsw and bdevsw structures. The intent is to specify a set of interfaces for drivers that provide a binary and source code interface.
