Tesla ' s ether was rigidified by rapidly varying electrostatic forces, and was thereby involved in gravitational effects, inertia, and momentum, especially in the space near earth, since, as explained by Tesla, the earth is “ ...like a charged metal ball moving through space ” , which creates the enormous, rapidly varying electrostatic forces which diminish in intensity with the square of the distance from earth, just like gravity.

There are a lot of articles on the net that mention Nikola Tesla's ether (aether) theories, such as this quote: Only the existence of a field of force can account for the motions of the bodies as observed, and its assumption dispenses with space curvature. All literature on this subject is futile and destined to oblivion.

In 1901 Nikola Tesla was one the first to identify “ radiant energy. ” Tesla says that the source of this energy is our Sun. He concluded that the Sun emits small particles, each carrying so small of a charge, that they move with great velocity, exceeding that of light. Tesla further states that these particles are the neutron particles.

Third: Let's Talk About Physics And Aether: Tesla Versus Einstein (The Rest Of This Website)!!! Everyone knows that light is a particle and that photons exist. No less than Einstein and Planck said these particles exist (i.e. what Einstein called "photons"). According to this theory, the sun creates photons, light bulbs create photons, etc. etc.
